SuiteMed HealthCare Portal

SuiteMed Software integrates your business operation and care delivery process through our **HealthCare Portal** by providing a superior communication link anywhere an Internet connection is available. Designed by physicians, our **HealthCare Portal** enhances the healthcare experience for you and your Patients. Patients can access a secure and personalized healthcare homepage to view lab results, access current health records, view/update appointments and schedules, refill prescriptions, and receive/reply notes from their personal computer anywhere in the world. Disease Management Tools and patient outcomes can be delivered automatically to your patients through the Patient Portal and they receive healthcare information through self-education. With the **HealthCare Portal**, they can register for office visits through a secure Internet interface. Giving them the ability to become closer to your practice empowers them to participate in the care process.

By using our **HealthCare Portal**, Patients can enter demographic information and complete comprehensive questionnaires concerning social, medical, and family history at the same time. Patient's Chief Complaint can be completed at home and delivered and imported into **IMS** as specified by the doctor. The most important thing is **SuiteMed's HealthCare Portal** allows your staff to devote additional time to revenue generating clinical activities rather than lower priority administrative duties.
